

• **QUALIFICATIONS** •

Principal, James A. Bates, is certified in both Erosion and Sediment Control, as well as Storm Water Quality. He has received a certification in wetland delineation and has been working as a wetland ecologist for over 9 years. Mr. Bates has worked with his clients and the both the ACOE and NYSDEC on wetland line verifications, permitting, and mitigation on many projects. He has also worked with clients to gain planning board and permit approvals on large projects.

Our staff of experienced professionals contribute to the company's strong team-oriented approach. Each member was handpicked for the specialized knowledge and ability to work with clients to help them achieve their goals. Careful project management by senior personnel ensures that clients gain maximum benefit from the combined qualifications of our staff.

Ecological Analysis, LLC
633 Route 211 East
Suite 4, Box 4
Middletown, NY 10941

assuring a sustainable future

Ecological Analysis, LLC, is an environmental planning and natural resources consulting firm. Working in the Environmental and Fisheries fields for over 20 years has provided the Ecological Analysis senior staff with a vast exposure to and experience with many aspects of the environmental arena. Projects we have been associated with have ranged from the designing and building of fish farms as well as operations therein, to SEQRA, site plan work, approvals and permitting for large residential developments.

We have the necessary experience working with both clients and various agencies to ensure favorable outcomes for all concerned.

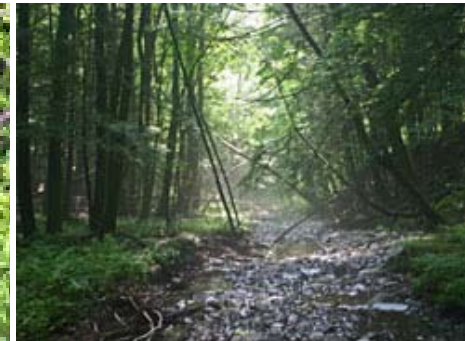

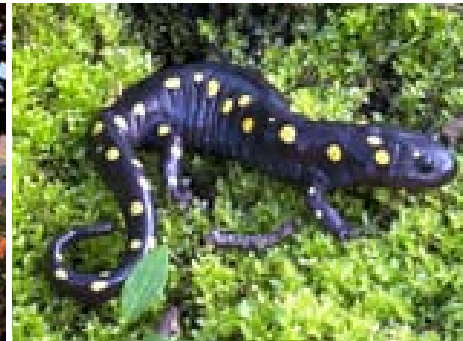

ASSURING A SUSTAINABLE FUTURE

We believe every client is important and receives the best of our efforts.

We develop achievable goals for our clients and continue working to accomplish them, whether this is with the local planning boards, environmental conservation boards, or obtaining state or federal permits for a large project or an individual property owner.

Our staff has been working in lower New York State for many years and understand the complex ecological communities from the lower Westchester urban areas, through the Hudson highlands, and out through the Catskills. Each area is unique and distinct with different types of ecological communities and political environments.
