We Turn Permitting Into Progress

"For the last 10 years,
they have shepherded wetland
delineation, wildlife, and eagle
nesting migration projects for us.
Jim and his team are always
accommodating and proficient."

— Steve Dubrovsky, Chapin Estate

A Comprehensive Approach to All Environmental Services

Our team of scientists and planners have over 150 years of combined experience specializing in environmental analyses and planning. We possess extensive knowledge of New York State's complex ecological and landscapes and fully understand the regulatory process required to successfully develop land while protecting delicate habitat and inhabitants.

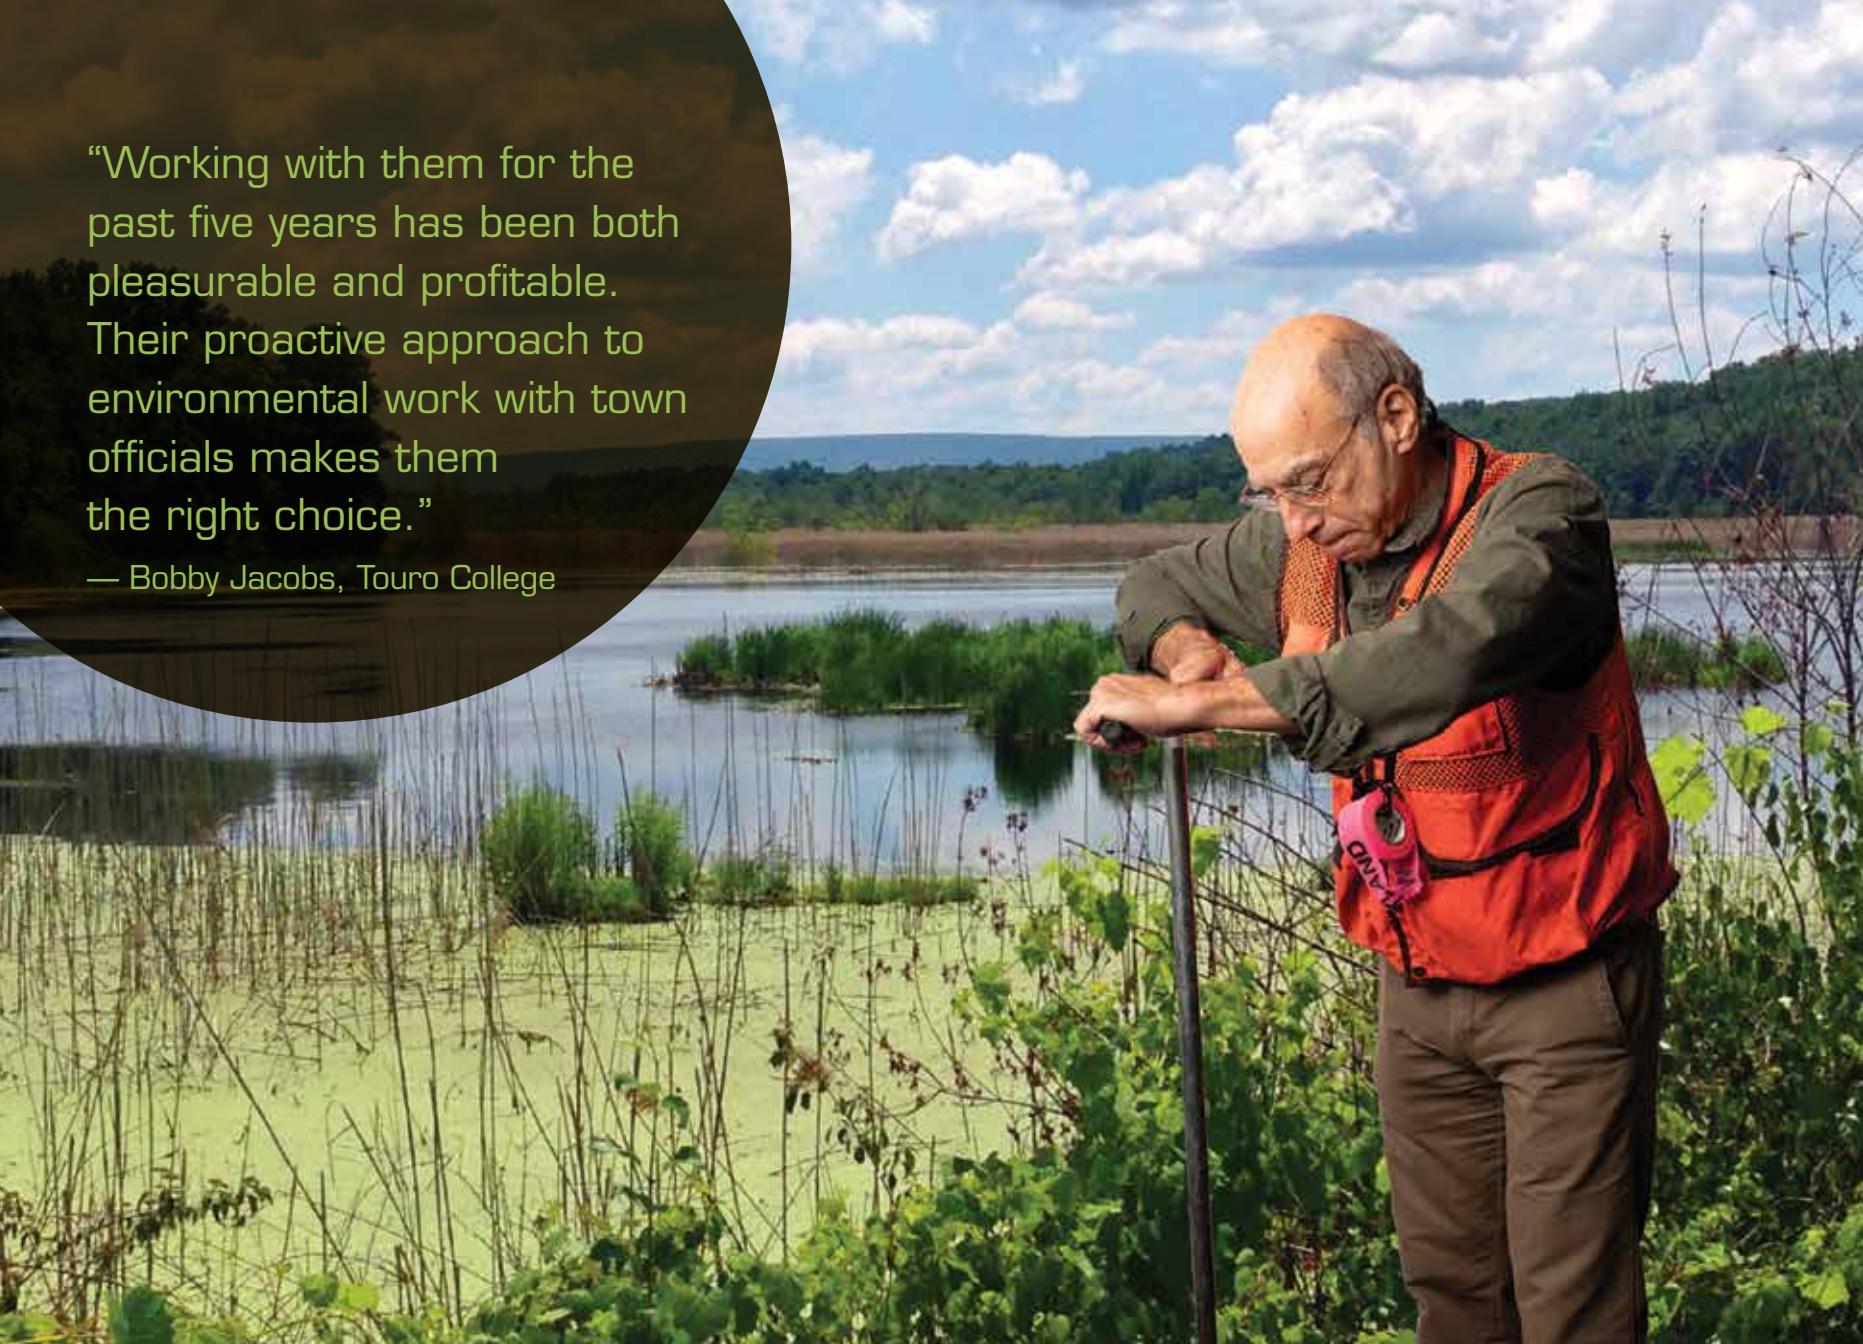

A Growing List of Successful Projects and Happy, Satisfied Clients

Solving environmental problems with sustainable solutions runs parallel with Ecological Analysis' top business strategies—a successful project and a satisfied client. We are just the right size firm to provide each client and their project with a hands on, individual approach. Obtaining the intended goals of the client and seeing every project through to completion is the number one objective of our project team. Your project's success is our highest priority.

“Working with them for the past five years has been both pleasurable and profitable. Their proactive approach to environmental work with town officials makes them the right choice.”

— Bobby Jacobs, Touro College

Services

Aquaculture—Design/Build
Amphibian Studies
Aquatic & Fisheries Studies
Ecological Site Assessments
Endangered Species Surveys
Environmental Inspections
Environmental Site Assessments (ESA)
Environmental Impact Studies
State Environmental Quality Review Act (SEQRA) Studies
Environmental Assessment Forms (EAF)
Draft & Final Environmental Impact Studies
Environmental Construction Monitoring
Natural Resource Inventories
NEPA Documents
Site Planning
Surface Water Studies
Stormwater & Erosion Controls
-Studies and Monitoring
Vegetation Surveys
Wetland Delineations to Federal/
State/Local Regulations
Wetland Permitting
Wetland Mitigation and Monitoring Plans
Wetland Construction & Planting
Wildlife Management Plans

An Experienced Team with a Deep Knowledge Base and a Track Record of Success

JAMES A. BATES, CPESC, CPSWQ—Principal

Jim's background in ecology and 30+ years in environmental analyses, including wetlands, wildlife, and vegetation assessment studies for site development and management. With over 10 years of management experience, he understands the process and oversees your path to success.

STEPHEN V. CACKOWSKI—Senior Environmental Scientist/ SWPPP Inspector

In 40+ years, Steve has conducted over 800 Environmental Site Assessments. He has led inspections for the presence of asbestos, lead based paint, mold, and for OSHA compliance. His work as a Senior Environmental Scientist and SWPPP Inspector includes projects for clients including Chapin Estates, NASA, and the U.S. Department of Defense.

BRUCE R. FRIEDMANN—Senior Environmental Scientist

Bruce has over 40 years of experience in ecological studies and has a background in Zoology, Marine Science and Engineering. He has local, regional and international experience along with an industrial background that includes aquaculture and wastewater treatment. Bruce is an expert in collecting and interpreting field data and integrating it into applications.

KENDRA J. LINTER—Senior Planner/Project Manager

Kendra is an urban planner with degrees in environmental science and forest biology. She has over 15 years of experience in land use, environmental science, and comprehensive planning throughout New York State and Connecticut. As senior planner and project manager, Kendra shepherds your project supervising SEQRA and NEPA documentation.

JAMES STANLEY—Graphic Designer

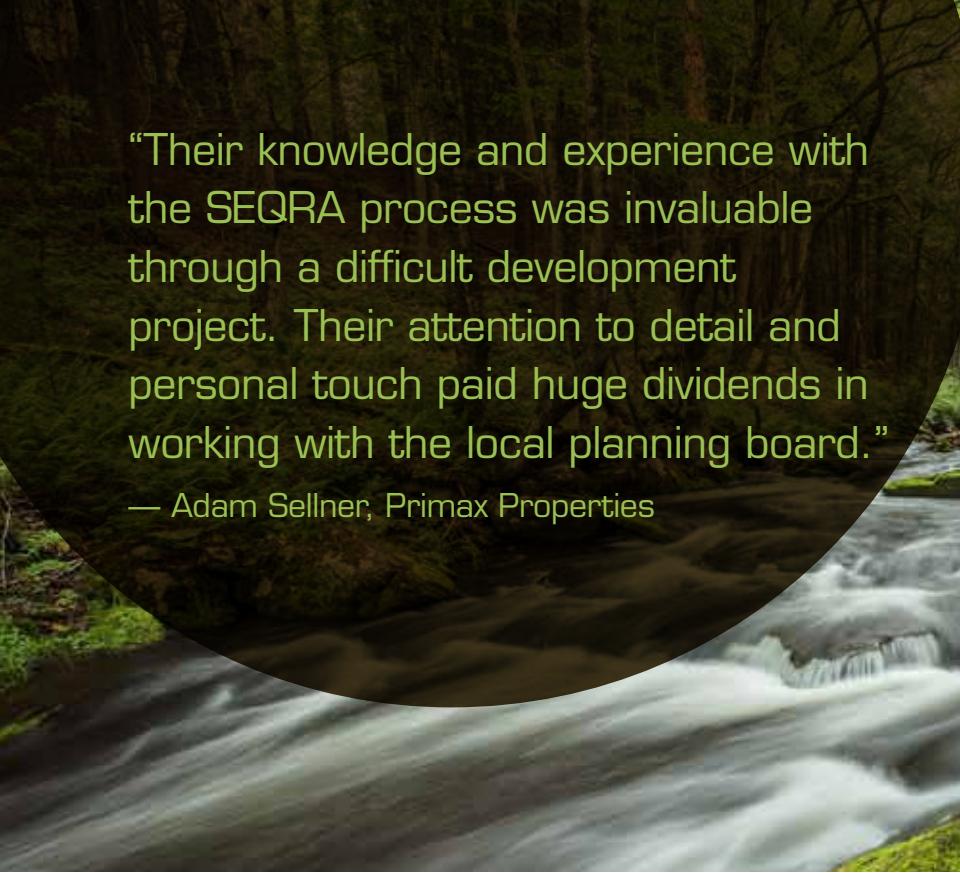

Jim has a Bachelors in Geology. And is trained in the latest graphic design software. He provides all visual communications for Ecological Analysis. Jim provides the visual support and impact for proposals and presentations through architectural visualizations, construction simulations, and pre and post-development photo simulations.

CAROLE DAVIDOWSKI-CACKOWSKI—Environmental Scientist/ Permitting/Administrative Assistant

Carole has a degree in Biology with an emphasis in Fisheries and over 35 years of experience in the environmental business. Carole handles permitting and provides administrative support to the clients and staff of Ecological Analysis.
